

BEV Seat

Ergonomic low built seat, specially designed for easy individual adaptation using a variety of BEV options.

Originally designed for use in combination with our swivel seats and seat lifts, the BEV seat is a highly adaptable seat with a wide number of accessories for individual adaptation.

A variety of accessories such as torso or lumbar supports can be fitted and the cushions are easily removed from their Velcro fasteners for cleaning or replacement.

The sides of the cushion have easy-slide upholstery for transfers to and from a wheelchair. The BEV seat is also easily adapted for children who need a shorter cushion or have other particular needs.

The BEV Seat is tested and approved according to M1 standards in combination with Turny and Turnout.

Quick facts

- Highly adaptable with many accessories
- Low built
- Tested and approved for use as wheelchair seat and car seat
